

MTS300 The Cube

Multiple Tray Sterilization Technology

MTS300 The Cube transforms the way in which we sterilize multiple trays of surgical instruments for a single case. Facilities can now load their vendor trays into one unit, process them, and then conveniently transport them directly to the OR for immediate use.

Surgeon and staff satisfaction

SPD throughput

Workflow efficiency

BENEFITS OF MTS300 THE CUBE

Surgery delays and cancellations

Setup time in OR

Dry times post sterilization

MTS300 The Cube offers sustainable solutions for sterilization

Features include:

- ▶ No wrapping/unwrapping necessary
- ▶ Sterilize up to 12 trays per load
- ▶ Transportation system enables easy transit to the OR
- ▶ For use with uncovered, perforated or wire mesh general delivery trays

"We can fit an extra case in each OR every day... that's how much time we save up there. I feel like I am helping hundreds of patients get their surgery done sooner so they don't have to wait as long. It's a great feeling."
